Ice Melt and Ice Melt Grit Blend

Fast acting de-icer for concrete, asphalt and other surfaces

Description

A fast acting de-icer that can be used for most surfaces. Suitable for temperatures down to -30°C. Watco Ice Melt is 30 times more effective than rock salt at very low temperatures.

Coverage

6kg will cover approximately 60m².
12kg will cover approximately 120m².

Instructions

Please wear protective gloves. Sprinkle a small amount of Watco Ice Melt over the ice or snow. Don't use too much. It will start acting within seconds. Watco Ice Melt Grit Blend will immediately improve slip resistance as the de-icer is mixed with a fine grit.

Caution

In common with rock salt, Watco Ice Melt may damage low-quality surfaces or contribute to rusting if in direct contact with metal. All left-overs should be brushed off after an hour to reduce the risk of damage. To avoid damage to decorative surfaces such as tiles, etc, we recommend a test on a small area first. Please only use on concrete that is more than one year old.

Storage

Re-seal the container and store in a dry place. If the container is sealed air-tight, Watco Ice Melt is durable for at least a year.

Ordering

All products are available direct from Watco UK Limited in the UK and through agents worldwide. All Watco products are sold subject to the Company's Standard Conditions of Sale.

The Company and its representatives are often asked to comment on potential uses of Watco products which differ from those described in the Company's data sheets. Whilst in such cases the Company and its representatives will always try to offer helpful and constructive advice, the Company cannot be held responsible for the results of such uses unless they are specifically confirmed in writing by Watco.
